

# WinTD 4.0

## Chess Tournament Pairing Software

Version 4 of WinTD improves on an already impressive program, offering many new features and enhancements for running tournaments both large and small. If you already have WinTD Version 2 or 3, you can update to Version 4 for just \$40, while new copies of the program are just \$90.

Some of the new features and improvements include:

- Available as a 32-bit application for much greater speed.
- Also now available for Macintosh systems.
- Computes distribution of money prizes.
- Imports player information from a spreadsheet file, including section assignment and bye processing.
- Imports full sections from a spreadsheet or text file.
- Can produce FIDE rating reports and tentative FIDE norms.
- Can automatically assign a player to specific board.
- Allows choice of USCF, FIDE and 2P rating systems for posting or master file maintenance.
- Improved ability to maintain master player files.
- Can search USCF database for close matches of names.
- For team tournaments, can fill in players' names on the score sheet.
- Includes a section type for "bughouse" tournaments.
- Can automatically divide players into sections of similar

size, grouping by rating, or to achieve similar strengths.

- More pairing styles including hybrid round robin Swiss and Scheveningen.
- Improved support for round robin tournaments.
- Game windows can be optimized for flexible web posting.
- Configurable "please wait" message for byes.
- Printed cross tables can be sorted on a wider range of keys.
- Charts and tables can be computed through a requested number of rounds, making it easier to write articles about the tournament.
- More flexible prize list generation for non-monetary awards.
- Includes the changes to the pairing rules included in the forthcoming revision of the USCF rule book.

In addition, there have been quite a few minor improvements: better formatted dialog boxes, using tabs for the more complex ones. Some additional preference items have been added, and some items which formerly were preferences have been found to be better incorporated as flags for the tournaments or sections.

Please visit our web site or contact our offices for more details. You can order by phone, by e-mail, by mailing or faxing this form, or via the on-line order form on our web site.
